PROFESSIONAL SUMMARY

Early-career Full-Stack Software Engineer with hands-on experience as an Intern Software Developer at Sri Lanka Telecom, contributing to projects like DebtX. Proficient in MERN stack development, with solid backend system skills and exposure to AI/ML-integrated applications and cross-platform mobile development. Focused on delivering scalable, user-centric software solutions, with strong problem-solving abilities and a commitment to continuous learning.

EXPERIENCE

Intern Software Developer - Sri Lanka Telecom, Colombo, Sri Lanka

January 2025 – July 2025

- Developed scalable full-stack modules using the MERN stack (MongoDB, Express.js, React.js, Node.js) to support enterprise-level debt recovery operations.
- Optimized backend API performance and system response times, resulting in improved system efficiency and reduced latency.
- Collaborated with cross-functional teams to integrate frontend components with backend logic, ensuring seamless user experiences.
- Enhanced data handling processes and implemented efficient database queries for high-volume transactional operations using MongoDB.
- Contributed to the design and debugging of UI features and RESTful APIs, improving user functionality and addressing performance issues in production.

EDUCATION

BSc (Hons) in Information Technology Specializing in Information Technology - Undergraduate

Sri Lanka Institute of Information Technology (June 2022 – Present)

CERTIFICATIONS

- **Higher Diploma in Information Technology –** Sri Lanka Institute of Information Technology, Dec 2024
- **Computer Hardware Technician (NVQ Level 4)** – Department of Technical Education & Training, Dec 2022
- **Diploma in English (Intermediate)** – Aquinas College, 2023

TECHNICAL SKILLS

Languages: Java, JavaScript, Dart

Frontend: React.js, Flutter, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, Spring Boot

Databases: MongoDB, MySQL, Microsoft SQL Server

Tools: Git, GitHub, Postman, Swagger, Figma, VS Code, Android Studio

Technologies: REST APIs, Microservices, Cloudinary

SOFT SKILLS

- Problem Solving
- Team Collaboration
- Communication
- Adaptability
- Time Management
- Critical Thinking

ACADEMIC PROJECTS

ChromaBloom - AI-Based Caregiver Empowerment & Support System for Children with Down Syndrome
June 2025 – June 2026 (Final year Research Project)
Component: Interactive visual task scheduler

- Engineered an AI-powered Interactive Visual Task Scheduler to deliver adaptive daily routines for children with Down syndrome
- Developed a cross-platform Flutter mobile application with multimedia support (animation + audio (TTS)) to enhance accessibility and user engagement
- Built scalable RESTful APIs using Node.js and MongoDB for routine management, scheduling, and data handling
- Implemented a behavioral analytics pipeline to capture performance metrics (completion rate, skipped steps, duration trends)
- Integrated a LightGBM-based machine learning model to adjust task difficulty using a 14-day adaptive cycle automatically.

SereneMind - A Machine Learning-Based Personalized Mental Health Support Platform
February 2025 – April 2025

- Developed a MERN stack-based mental health platform for mood tracking and self-care personalization.
- Designed interactive UIs in React.js for journaling, activity tracking, and resource access.
- Integrated RESTful APIs and JWT-based authentication for secure, role-based user access.
- Collaborated on system architecture to ensure scalability and modular ML integration.

LearnLoop – Skill Shared Web-Based Platform
March 2025 – May 2025

- Developed a full-stack web application using Spring Boot (backend) and React.js (frontend) for skill-sharing and learning plan tracking.
- Implemented OAuth 2.0 authentication with role-based access and secure user management.
- Designed interactive features like posts, media uploads, comments, notifications, and follow/unfollow functionality.
- Built and integrated RESTful APIs to manage learning plans, user profiles, and real-time progress tracking.
- Ensured system scalability, performance, and user engagement using MongoDB**,** Tailwind CSS, and responsive design principles.

HerbCare – E-Commerce Herbal Product Platform
Jan 2024 – May 2024

- Developed the Gift Package Management module, allowing users to create, customize, and manage personalized herbal product bundles.
- Built the Feedback & Complaints module, enabling registered users to submit reviews, ratings, and raise complaints with resolution tracking.
- Implemented full-stack functionalities using MERN stack (React.js, Node.js, Express.js, and MongoDB) to support user engagement and satisfaction.
- Ensured smooth integration of custom packages into the order workflow, including confirmation, edits, and delivery coordination.
- Collaborated with the team using GitHub for version control, Figma for UI design consistency and Draw.io for design UML diagrams.
